

Name _____ Period _____ Date _____

The statements below have been developed to help students determine the appropriate level math course for them. In each row, circle the statement that best describes you.

Describe Yourself as a Math Student

	Statement A	Statement B
1	In class I feel like I am often a step behind or need more time to complete the work assigned.	Usually in class the work has either been the appropriate level of challenge for me or it is easy.
2	This year I have needed the help of friends, a tutor, or extra help regularly from the teacher to achieve my goals.	This year I have achieved my goals with minimal additional assistance.
3	I like it when teachers explicitly outline the steps necessary to solve problems and break problems down for me. I like it when teachers check in a lot to make sure we get it.	I'm an independent learner. I enjoy breaking down problems myself or in collaboration with other students. I do not feel frequent check-ins with the teacher are necessary.
4	I enjoy knowing that a problem has a solution and that the teacher will help lead me to it.	I enjoy problems where the answer (if there is one) may not be so obvious and trying on my own to solve it.
5	With assistance I can usually make connections and understand how things work.	I enjoy figuring out how things connect together to form a working unit. Spending time puzzling something out is enjoyable to me, and often I am successful at this on my own or with minimal assistance.
6	I usually find myself struggling to do all my homework and still get enough time to eat, sleep and do my extra-curricular activities.	I usually have enough time to eat, sleep, and do my extra-curricular activities, as well as my homework.
7	I have other passions that take up my time and energy.	Math is a passion of mine and that is where I will devote a lot of my time.

If you selected mostly:

- Statement A – Advanced College Prep (ACP) sounds like it may be a good fit for you
- Statement B – Honors (H) sounds like it may be a good fit for you

The math courses offered at WHS for students of your level are listed below. Based on your results from the description of you as a math student, and our discussion in class **write a paragraph** below about which course you would choose for yourself and why.

Math Courses
