

For Investigation 1-2 Quiz, you should be able to:

- Graph a linear equation in slope-intercept form
- Graph a linear equation in standard form
- Find the x-intercept, y-intercept, and slope given equations in slope-intercept and standard forms.
- Change an equation from slope-intercept to standard form and from standard form to slope-intercept form.
- Write a system of equations from text.
- Determine the number of solutions for a system of equations.
- Solve systems of equations.
