

Graphing Parabolas Classwork

Find the key features of the parabolas for the equations below, and graph each parabola.

Features include:

- Opening up or down
- y-intercept
- x-intercept(s)
- Line of symmetry
- Vertex
- Two additional points

A. $y = x^2 + 12x + 32$

D. $y = x^2 + 8x + 7$

B. $y = x^2 - 4x - 5$

E. $y = x^2 + 6x + 8$

C. $y = x^2 - 9x + 20$

F. $y = x^2 + x - 6$

Skill: Graphs of Parabolas

Investigation 2

Frogs, Fleas, and Painted Cubes

Graph each function. Label the axis of symmetry, the vertex, and the y-intercept.

1. $y = x^2 - 6x + 4$

2. $y = x^2 + 4x - 1$
