

Solve the following Systems of Equations using Substitution

1. $y + 11 = 6x$
 $-2x - 3y = -7$

2. $6x + 6y = -6$
 $5x + y = -13$

3. $3x + y = 5$
 $5x - 4y = -3$

4. $-3x + 3y = 4$
 $-x + y = 3$

5. $-3x - 3y = 3$
 $5x + y = -17$

6. $x + 3y = 1$
 $3x + 3y = 15$

7. $y = -2$
 $4x - 3y = 18$

8. $2x + y = 20$
 $6x - 5y = 12$

9. $-4x + y = 6$
 $-5x - y = 21$

10. $-5x + y = -3$
 $3x - 8y = 24$
